Media trolleys and media cabinets

For classroom teaching, hybrid teaching and conferencing

- **ino.tower** as a media trolley and media cabinet (images left) in numerous design variants and customisable for every application
- Numerous other customisable variants as media trolleys or columns for accommodating large displays, video conference cameras, preview displays and other technology, e.g. for meeting rooms and hybrid teaching

inobjekt.com/en/media-trolleys

Media tables and media lecterns

inobjekt

Teacher and lecturer workstations for classrooms and lecture halls up to the Audimax

- Numerous basic models for different room types and requirements
- Customised adaptations to existing and future media technology
- Consideration of room requirements and customer wishes
- Focus on ergonomics and accessibility
- Focus on theft and vandalism protection
- Development of completely new concepts from the ground up

Contact us and we will be happy to develop a customised concept together with you!

Media table ino.basic

Electromotive height-adjustable media table in numerous variants

- Electromotive height adjustment for ergonomic working conditions
- Integration of connection panels, cable outlets, etc.
- Various options for the integration of displays
(without display, flush-mounted, with swivel arm or in display box)
- Technical cabinet and keyboard drawer optionally available

inobjekt.com/en/inobasic

Media table ino.desk

Optimum working conditions with integrated and BYOD devices

- Electromotive height adjustment for ergonomic working conditions
- Lockable compartment at the rear with connection and storage options for laptop, document camera, power strip, etc.
- Lockable compartment at the front for technology and additional open compartment. Technical cabinet and keyboard drawer optionally available

inobjekt.com/en/inodesk

Media table ino.vation

Secure integration of media technology through lockable compartments

- Electromotive height adjustment for ergonomic working conditions
- Side pull-out for secure storage of a display or notebook
- Rear storage compartment for document camera, next to installation panel
- Technology cabinet for computer, media control, etc. with open compartment above. Optional pull-out for keyboard and mouse next to it

inobjekt.com/en/innovation

Media table ino.teach II

Teacher's workstation for the safe storage of all devices

- (Electromotive) height adjustment of the display
- Inclinable holder for display
- Side pull-out as extended work surface and display cover of the display (can be fixed with a foot using a locking brake)
- Storage compartment for document camera and technology cabinet

inobjekt.com/en/inoteach

Media lectern teach.education

Standing lectern with a wide range of equipment options

- Side pull-outs for notebooks, document cameras and projectors
- Fixed manuscript shelf or as an insert shelf
- Storage space at the bottom for media technology and teaching materials
- Removable rear panel for simplified installation and revision
- Numerous other equipment options such as name or logo plate

inobjekt.com/en/teacheducation

Media lectern teach.uno

Electromotive height-adjustable media lectern

- Electromotive height-adjustable inner body with laterally sliding manuscript and notebook shelf as lockable cover for display
- Side pull-out on the right for document camera
- Lockable desk housing with up to 8 height units
- Numerous other equipment options

inobjekt.com/en/teachuno

Media lectern teach.duo

Electromotive height-adjustable media lectern for large lecture halls

- Laterally movable and lockable desk covers to enlarge the work surface
- Sufficient space underneath for interactive displays, document cameras, touch panels, connection panels, etc.
- Technical cabinet with slide-in doors for two 19" equipment racks with 8 U each

inobjekt.com/en/teachduo

Media lectern teach.formosa

Electromotive height-adjustable standing lectern with flexible table

- Manuscript shelf, including side pull-out for document camera
- Flush-mounted integration of an (interactive) display
- Optional integration of digital signage display in the front panel
- Technical base cabinet with 8 U and integration options for microphone holder, touch or connection panels, drinking glass holder, etc.

inobjekt.com/en/teachformosa

Media lectern teach.ruota

Wheelchair-accessible sitting and standing workstation

- Electromotive height-adjustable sitting and standing workstation
- Seating niche suitable for wheelchair users optionally on the left or right
- Table top with signal management or installation module
- Technical cabinet for up to 9 height units of installation technology
- On plinth or mobile with castors

inobjekt.com/en/teachruota

Media lectern teach.magna

Height-adjustable standing lectern with attached workstation

- Standing desk with fixed outer body and motorised height-adjustable technical module
- Top right side pull-out for document camera
- Hinged and lockable rear panel for installation and inspection
- 12 U storage space each for media technology in the desk and workstation

inobjekt.com/en/teachmagna

Computer tables

Participant desks with display box for PC rooms and hybrid rooms

- Lockable display box for displays up to 27" with keyboard and mouse
- Cover plate with gas spring, adjustable for glare-free working
- Free work surface for other room uses when closed
- Free configuration of frames and seating options for every room
- Customised adaptations, e.g. with computer module & connection panels

inobjekt.com/en/computer-tables

Media walls

Customised solutions as a fusion of design, modern media technology and functionality

- **inobjekt has been an experienced specialist in the development and production of media walls since 1991**
- **Media walls for displays, LED panels or projectors in all image sizes**
- **Integration of media technology (e.g. 19" racks) and floating panel systems (e.g. for whiteboards)**
- **Customised configuration of shelves and cabinets in terms of size and function**
- **Optimally customised concepts for learning spaces and prestigious environments**

Contact us and we will be happy to develop a customised concept together with you!

Media wall ino.wall

Interactive media wall for classrooms, seminar rooms and conference rooms

- Integration of large displays up to 98" with simple height adjustment
- Optional floating board system with whiteboard or chalkboard surfaces
- Individual design in size, shape & colours to suit every room
- Customised configuration of shelves and cupboards for teaching materials (e.g. shelf boxes) & media technology (e.g. 19" racks)

inobjekt.com/en/inowall

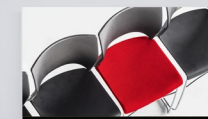

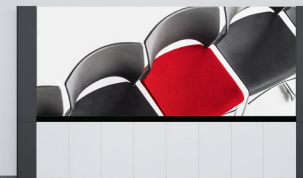

Media wall led.wall

Representative media wall for conference and seminar rooms, foyers and lecture halls

- For the integration of LED panels & displays of any size
- Integration of media technology (e.g. 19" racks) & video conferencing modules
- Optional side speaker cabinet with high-quality speaker fabric
- Customised configurations, sizes & designs for every application

inobjekt.com/en/ledwall

Media columns

For offices, conference rooms, lounges and showrooms

- For accommodating (interactive) displays of any size
- Secure storage space for media technology and catering
- Integration of connection panels and media controls
- Optional camera modules for successful video conferences
- Can be supplemented with a conference table

inobjekt.com/en/media-columns

Media sideboards

For the integration of displays, projectors and projection screens

- Media technology installed in a visually appealing way
- Devices can be securely locked if required
- Technology is ready for operation within seconds
- Integration of connection panels and BYOD solutions possible
- Separate storage space for office supplies, catering, etc.

inobjekt.com/en/sideboards

Conference tables

For prestigious offices and conference rooms

- Visually appealing integration of media controls, connection panels, displays, video conferencing modules, projectors and other media technology
- Wide range of design options in terms of size, shape and surfaces
- Organised cable routing, even under the table top up to the floor tank
- Electromotive height adjustment possible

inobjekt.com/en/conference-tables

Lecterns

For prestigious conference and seminar rooms and event spaces

- Integration of microphones, connection panels and other media technology
- Additional modules such as drinking glass holders
- Electromotive or manual height adjustment possible
- Customised branding with foil printing, Plexiglas name and logo plates or digital signage displays

inobjekt.com/en/lecterns

Planning

- From inventory and requirements analysis to 3D visualisation
- Customised furniture and room concepts for conference and seminar rooms
- Analysing the customer's requirements and wishes as well as the room conditions on site
- Drafts, cost estimates, tender documents and cabling plans
- Design planning and 3D visualisation using CAD planning tools
